DOOR & WINDOW POSITIONS MAY BE DIFFERENT TO THOSE SHOWN ON SPECIFIC CONTRACT DRAWING

STANDARD COLOURS

- External : Wall Cladding, Fascia, Corner & Hire & European Divisions – Goosewing
- Bottom Wall Trims BS ref: 10 A 05
- Door leaf – Sales & Scottish Divisions – Britannia BS ref: 18 E 58
- Hire – Merlin Grey nearest BS ref: 18 B
- Portalo & Events – Poppy Red nearest European Division – Goosewing Grey nearest BS ref: 10 A 05
- Silver Anodised Aluminium.
- Manhattan Grey NCS S 2502-Y RAL-DS
- Sales & Scottish Divisions – Britannia BS ref: 18 E 58
- Hire – Grey nearest RAL 7042
- Portalo & Events – Blue Grey nearest European Divisions – Blue nearest RAL 5010
- White nearest BS ref: 00 E 55
- Grey to BS4800 ref: 10 A 05
- Hot dipped galvanised

- KEY**
- O OPEN WINDOW
 - F FIXED WINDOW
 - RWP RAIN WATER PIPE
 - CU CONSUMER UNIT

FOUNDATIONS

Simple foundations of level hardstandings are required to be capable of taking the foundation design load at each foot position of 42kN, which includes the dead weight of the building, imposed floor load of 3kN/m², imposed roof load of 0.75kN/m², and a basic wind speed to meet the requirements of BS6399: Part 2. The foundations are to be designed in accordance with BS8004 with level tops of a tolerance of ±3mm. The area of ground under the building, plus a surrounding 500mm must be no higher than 50mm below the tops of the building foundations.

All buildings are to be anchored to the foundations via the baseplate using M20 anchor bolts, unless it can be established that no climatic or other forces are likely to be applied so as to exceed the intrinsic stability of the building in its unloaded state. All Lodastrut legs should be fully retracted onto the safety stops with the leg pins fitted through the outer legs and secured by the locking cotter. It is recommended that professional advice is obtained for the design of the foundations.
